WORK EXPERIENCE

AI Research Engineer

Algogene Financial Technology Company Limited

March 2025 - Present
Hong Kong

- **Preprocessed internal company data for LLM training**, including cleaning, chunking, and vector embedding
- **Fine-tuned a Large Language Model (LLM) using Retrieval-Augmented Generation (RAG)** on internal company data, leveraging Ollama for model deployment and Qdrant as the vector database to enhance retrieval efficiency, resulting in a 50% improvement in inference speed

Data Science Intern

Resume Page Limited

Jun 2024 - Aug 2024
Hong Kong

- **Developed a personalized profile chatbot** that allows inquiries about one's background powered by Llama, integrated with a MySQL database and a web interface using Streamlit and Gradio, resulting in a 35% increase in user engagement
- **Engineered an AI-powered business card scanner** using PyTesseract and integrated profile-sharing functionality via face recognition, leading to a 30% increase in information exchange speed
- **Performed a comprehensive business analysis** that identified critical challenges in hiring, UI/UX, and marketing; delivered actionable recommendations to management, enhancing strategic decision-making

Data Analyst Intern

IESHER

June 2023 - Aug 2023
South Africa (Virtual)

- **Analyzed World Bank data from 100+ countries**, identifying key correlations between tax rates, healthcare accessibility, and youth population, and visualized findings using Python (Matplotlib, Pandas)
- **Conducted data-driven policy research** by analyzing 10+ global policies to identify best practices for potential implementation in Africa.

PROJECTS

Predictive Modeling for Prudential Life Insurance Risk Assessment

Jan 2025

- **Built a prediction model using over 100 variables to assess life insurance applicants** and effectively assign a risk level to each individual to support premium pricing decisions

OLIST E-commerce Customer Behavior Analysis

Oct 2024

- **Analyzed 50,000 e-commerce data using NLP, sentiment analysis, and visualizations** to understand consumer behavior and factors affecting customer satisfaction, which led to actionable business insights

LEADERSHIP & EXTRA-CURRICULAR EXPERIENCE

CityU Student Leadership Programme

Jan 2023 - Present

- Elite-100, Executive Mentoring, SEN Educator, PERMISI Buddy Programme, International Friends Club, Data Science Student Chapter

GenAI Hackathon For The SDGs Finalist

Hosted by HKU, HKUST, CityU, HKBU

Oct 2024
Hong Kong

- **Led a team of five nationalities to develop a smart fridge** featuring an inventory management system with scanning-based and selection-based input, along with an AI-powered recipe generator, shopping list creator, and personal chatbot
- **Coordinated the development of a pitch deck and delivered a presentation to judges** from four leading Hong Kong universities, successfully advancing to the top 10 rounds of the competition

Marketing Manager

TEDxCityUHongKong

Oct 2022 - Apr 2023
Hong Kong

- **Created and executed compelling social media campaigns**, including 27 engaging newsfeed posts within three months, resulting in over a 30% increase in engagement
- **Managed a promotion booth for two weeks**, engaging over 100 visitors with interactive games and providing information on the events, resulting in a 40% increase in event attendance
